Do late deliveries hurt customer satisfaction?

Olist marketplace | Jan 2017 to Aug 2018 | 96,203 delivered orders

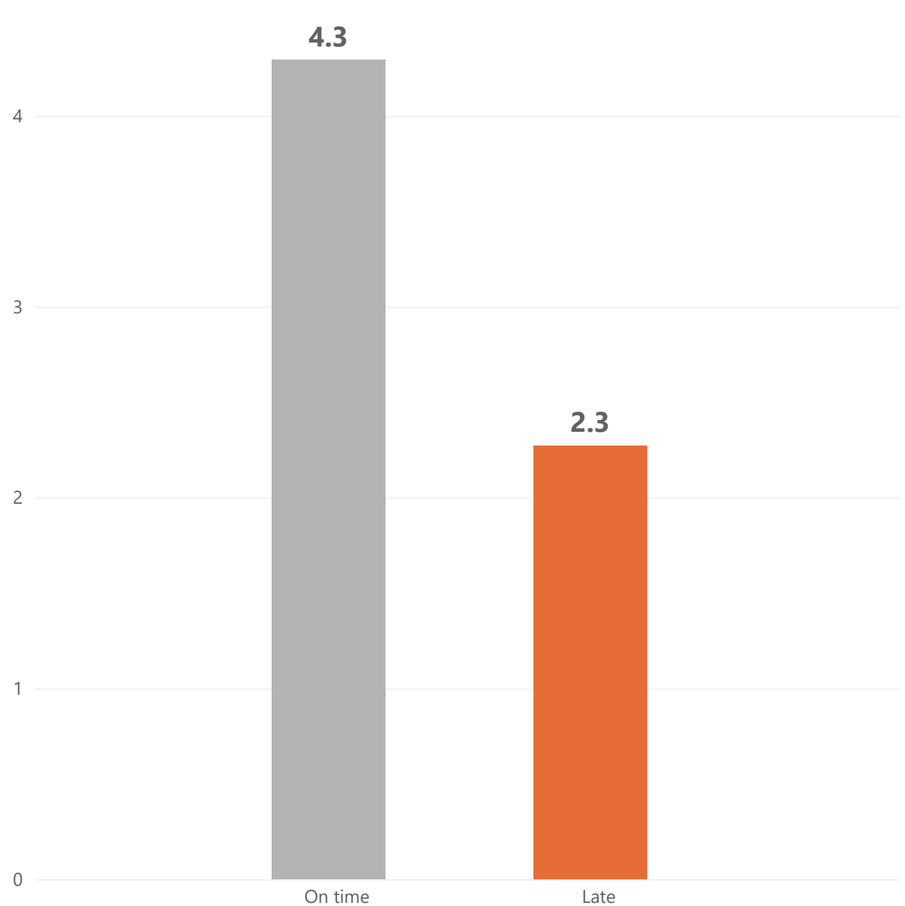

Overview | Where | Why and what to do

Total Orders	Late Orders	Late %	Avg Review	Avg Delivery Days
96,203	6,531	6.79%	4.16	12.1

Share of late orders by month

Late deliveries cut the average review score almost in half

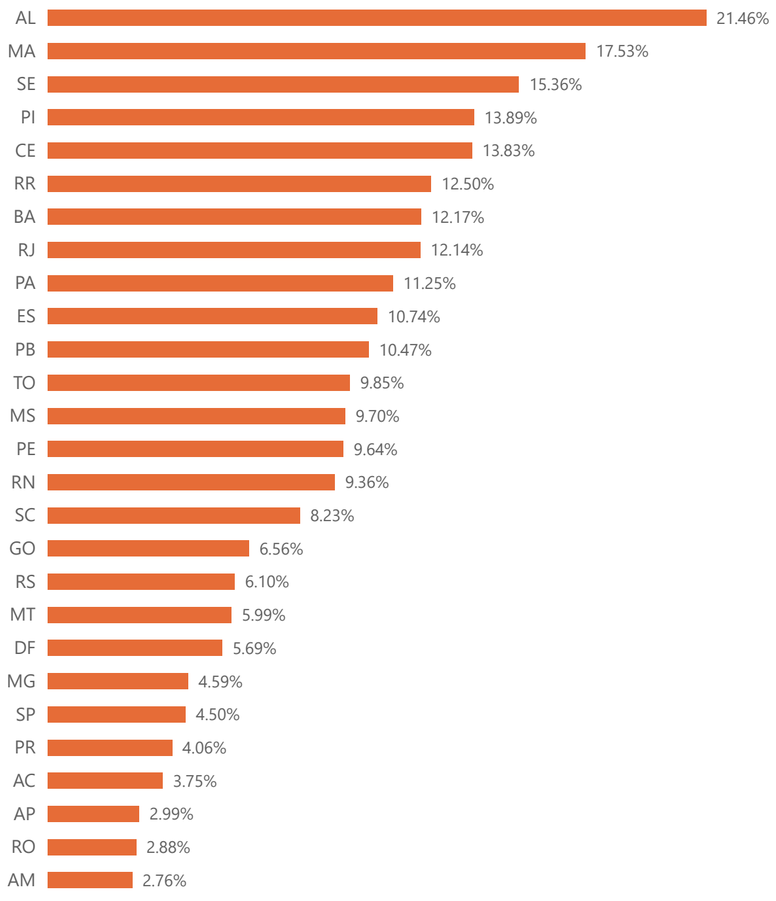

Where are late deliveries concentrated?

Olist marketplace | Jan 2017 to Aug 2018 | 96,203 delivered orders

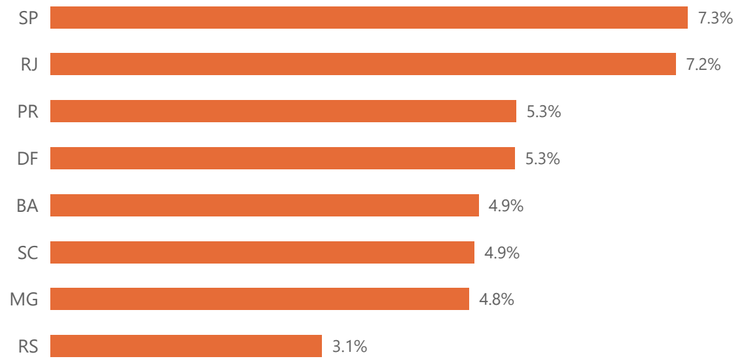

Overview | Where | Why and what to do

Total Orders	Late Orders	Late %	Avg Review	Avg Delivery Days
96,203	6,531	6.79%	4.16	12.1

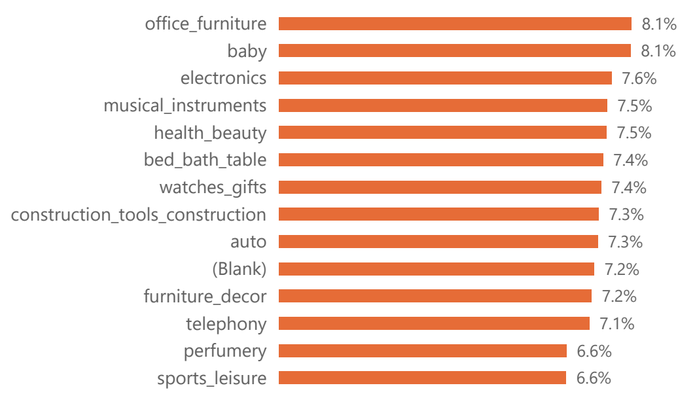

North and Northeast customers wait the most

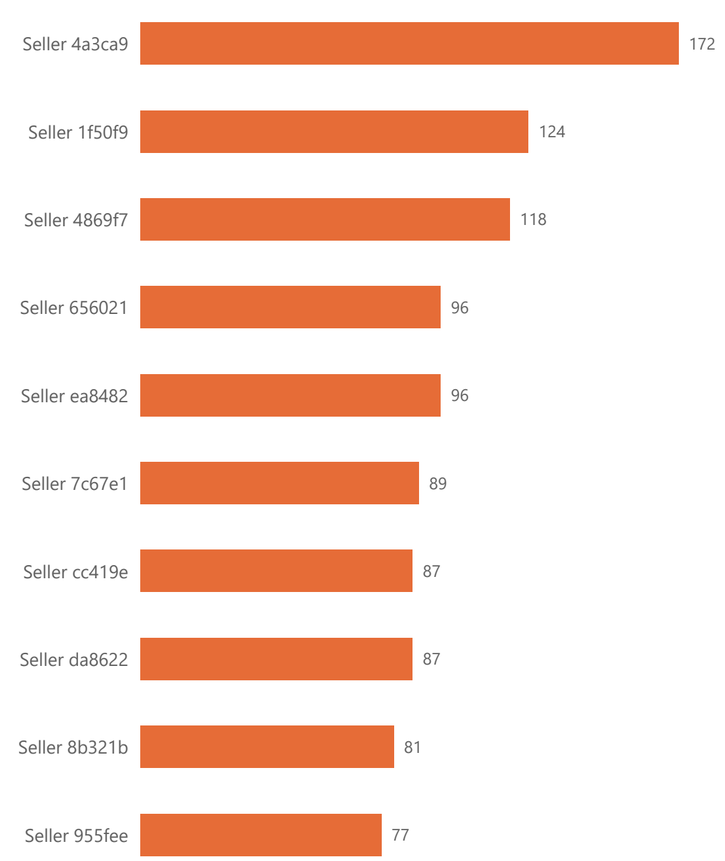

Sellers in SP and RJ have the highest late rate

Product category barely matters: 5% to 8% everywhere

A small group of sellers drives a large share of late orders

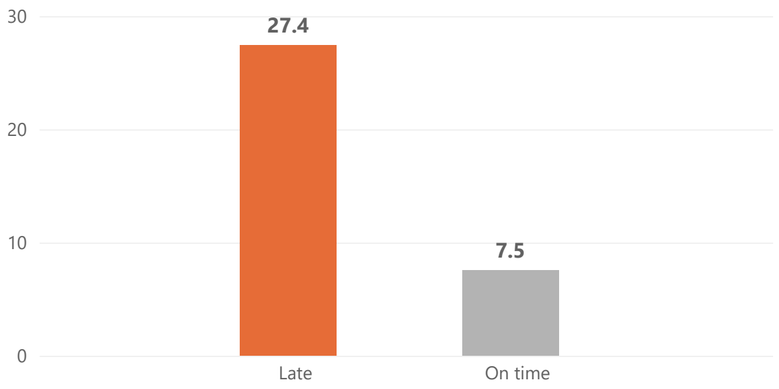

Why do deliveries run late, and what should Olist do?

Olist marketplace | Jan 2017 to Aug 2018 | 96,203 delivered orders

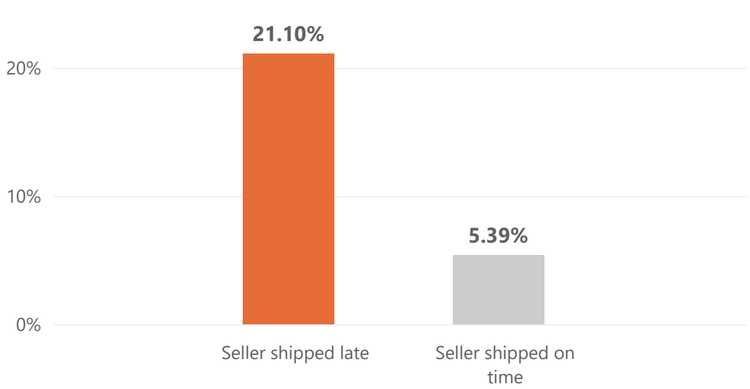

Overview | Where | Why and what to do

Total Orders	Late Orders	Late %	Avg Review	Avg Delivery Days
96,203	6,531	6.79%	4.16	12.1

Late orders spend 27 days with the carrier vs 7.5 on time

When the seller ships late, 21% of orders arrive late (vs 5%)

of late orders had a seller who shipped after the deadline

28%

What should Olist do?

1. Set realistic delivery estimates by region: add buffer days for North and Northeast states, where up to 1 in 5 orders arrive late.
2. Enforce a seller dispatch SLA: monitor the sellers who miss the shipping deadline. Late dispatch is behind 28% of late orders.
3. Hold carriers accountable: late orders spend 27 days in transit vs 7.5 for on-time orders. Track carrier SLAs by route.
4. Plan for peaks: add carrier and seller capacity before Black Friday and Q1, when the late rate jumped to 12-19%.

Why it matters: late orders get an average review of 2.3 vs 4.3, so cutting delays directly protects customer satisfaction.
